TOOL CONTROL SYSTEM

TRUE-CRIB

ORGANIZATION VISIBILITY ACCESS CONTROL ASSET MANAGEMENT AUTOMATION

Snap-on's True-Crib software is simple, intuitive and easy to operate. It provides faster, more accurate check in and out of assets in your tool crib while providing comprehensive analysis, reporting and tracking for your tool crib. Being able to accurately account for tools, equipment and consumables, at all times, is important in maintaining productivity and ensuring jobs are completed as scheduled.

No Assets Go Unaccounted For

Aids inventory management and re-ordering. Even keeps track of calibration schedules.

No Lines at the Tool Crib

Employee, tool and location entries are fast and accurate.

Simple to Operate

Single screen for over 90% of the functions.

No Guessing

Unique audio response confirms issue and turn-in.

No Paper Records

- Eliminate clutter and waste with a fully digital solution
- No labeling headaches with simple, custom label maker
- No custom software. Standard packages save you time and money

- Operates on Microsoft Access® database, but SQL Server is also supported
- Easily share the database on a network with thousands of computers using SQL Server
- Increase security by identifying employees via company ID, driver's license, barcode, or even fingerprints
