WHEN YOUR CREW SEES THE TOOLS THEY NEED, YOU'LL SEE OUTPUT IMPROVE.

Having a clear view of the tools you use enhances productivity in your workplace. Making tools easier to see reduces tool selection time and increases accountability for their return.

CUSTOMER BENEFIT

- Standardize Work
- Improve Productivity
- Control Inventory
- Reduce Losses

COLOR FOAM

Our high contrast color foam backing is perfect for helping missing tools stand out. Each kit contains six sheets of top and base material that you can customize to fit your tool drawers and your needs. Each kit also contains one cutting tool and one roll of tracing paper for easy customization. Sheets are self-adhesive and do not require spray glue.

COLOR TOOLS

Our color-coated tools are designed to stand out, making work in dark environments visibly easier. Each tool is covered with an innovative coating that bonds with the tool's surface, but doesn't interfere with the tight tolerances of Snap-on's tools and sockets. And if one of your tools goes missing, it'll be easy to locate, making it a snap to avoid FOD and FME.

FEATURES AND BENEFITS

- Color control with high visibility colors for special needs
- Professionally engineered foam cut layouts

FEATURES AND BENEFITS

- Coating withstands repeated use and corrosive environments
- Accepts laser etching for easy identification
- Applications exist in a wide variety of critical industries
- Available in a variety of colors
